An innovative solution to a tough problem: how to saw square by hand without even looking. The **Swing-Saw** meets this challenge head on! Thousands of applications in automotive, aviation, boating, camping, construction, plumbing and electrical installations.

- **CUT FASTER!** This labor saving hand tool is a clever combination of a **vise and a miniature hacksaw**. The top lever is moved back and forth as the body of the **Swing-Saw** is squeezed and the unique gripping vise clamps the part on both sides. Maximum vise opening is 1-1/2".
- Unlike a conventional hacksaw and vise, the **Swing-Saw** has a **six to one leverage advantage**, providing strong cutting action. Using the **Swing-Saw** insures a **perfectly square cut every time!**
- You can start a cut exactly where you want, no more skidding all over the part with a hack saw blade or jumping out of a cut already started. Best of all cut or nicked fingers are a thing of the past!
- **CUT ALMOST ANYTHING! EVEN SQUARE TUBING!** The **Swing-Saw** is not limited to the cutting of tubing. As a matter of fact, metal or plastic extrusions, shelving tracks, storm window frames, flexible conduit, AC cable, hoses, threaded rods and bolts, molding and wood dowels, can be cut efficiently by this hand tool with a **minimum amount of burrs**.
- **CARRY IT ANYWHERE!** The **Swing-Saw** handle can be folded and the hinged body latched for compact storage in a belt pouch. This rugged tool weighs less than two pounds and is always ready when you need it - especially handy on top of a ladder!
- Cutting in close quarters is a particularly easy task due to the built-in adjustable vise feature.
- **SPECIFICATIONS:** Main body and jaws made of hardened steel for long life. Hardened captive spring loaded retaining pins for easy blade changing. Die cast top housing.
Maximum vise opening:
Round material: 1-1/2" Dia. (38mm)
Square: 1.0" (25mm).
Rectangular: 3/4" x 1-1/2" (19 x 38mm).
Weight: 29 Oz. (830 grams). 9-1/2" long (240mm). Built in America with Swiss Army Knife quality.
- **ACCESSORIES**
B-109-24 Blade for thick wall tubing
B-109-32 Blade for thin wall tubing and metal hose
LP-123 Leather Pouch

Guaranty:

The **Swing-Saw** has a limited guaranty against defects for one year. During that time any parts (except the blade) will be replaced free; you only pay the one way shipping charge.
